THE WHITE PAPER

ABSTRACT

TravGoPV Token is a digital asset that has a use case that bring premium transportation services for the future, especially in tourism sector which running on binance smart chain blockchain platform.

The social benefits of this project are providing access as widely as possible for premium travelers transportation services providers to develop their businesses. While the benefits that will be obtained for our customers will be more efficiently and fast access.

Business Plan

A platform that created to make it easier for our customers to access and direct contact with service providers premium transportations

TravGoPV and the community can interact peer-to-peer Using the BNB blockchain and improving services without traditional intermediaries.

To achieve this ambitious goal, we will creating the TravGoPV Platform with high incentives driving technology, business and consumers to build, contribute and expand the ecosystem with us.

About Us

Real project will support today's cryptocurrency community to be favourite for the developer with project discourse long-term, with the strong community and fast turnaround funds in cryptocurrency.

Besides profitable for real projects to be carried out, investors will also benefit according to the value of cryptocurrency running.

TravGoPV was chosen as a real project which will be run on the community cryptocurrency that will provide many good advantages from the crypto market, community and investors.

TravGoPV carries the business concept B2C travel transportation with VIP services and facilities that will be provide convenience for customer because it will be available in website and mobile application services.

TravGoPV Token

Our vision is to promote exchange with open source system and free service on the internet.

To do this, we have built platforms that replicate many functions on the blockchain and other distributed systems. This is the goal that very ambitious and difficult technical challenges, but we has reached the initial milestone to prove our technology and initial use cases.

TravGoPV Platform has three main components which are all open-source:
- End user application of TravGoPV
- TravGoPV developer infrastructure
- TravGoPV protocol

Features & Benefits

To make it easier to find and choose services with a price comparison system and services provided.

Ability to trim almost anything transaction fees associated with ordering between the customer and the service provider. Various services that are beneficial for customers TravGoPV Token investors

Community & Real Project Based Business

TravGoPV was chosen as a real project that will run on a cryptocurrency community that will provide many good benefits from the crypto market, community and investors.

TravGoPV carries the concept of transportation business B2C travel with VIP services and facilities which will provide convenience for the customer because it will be available in service websites and mobile applications.

TravGoPV will operate throughout the region of Indonesia, especially in tourism areas with cooperate service providers existing transportation.

In addition to a strong community and investors, we wish TravGoPV will be the spearhead of the success for the TravGoPV crypto market itself.
